SOLARTECH solar showers Introduction

1 Products information

2 Materials of main body and accessories

3 SOLARTECH solar showers Features

4 Leakproof detection of SOLARTECH solar showers

5 Special choice of LED showerhead

1 Products information

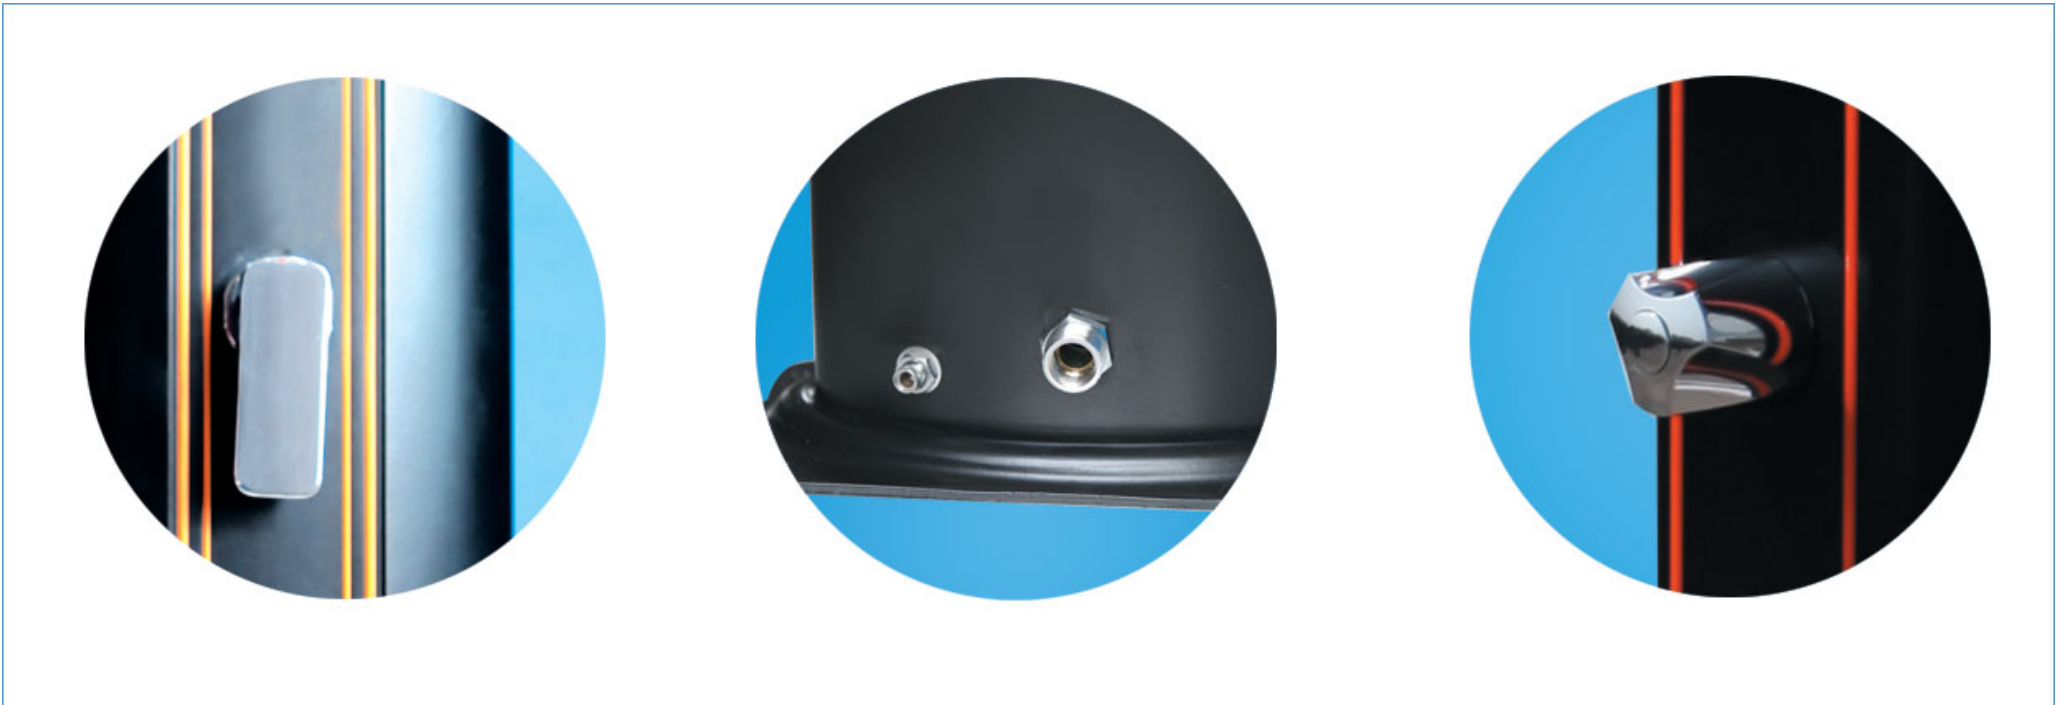

SOLARTECH manufactures 3 series (SA,SB,SP) and 4 styles (A,B,C,D), over 40 models solar showers. there are round, oval, square and bent, and the capacity is from 17L to 42L,.with all SOLARTECH solar showers, no matter for public or private use, they can fulfill your requirement.

4 styles and 3 series are as follow:

2 Materials of main body and accessories

Some external tubes are made of aluminium , others are made of plastic. the thickness of external tubes are from 2.5mm to 3.7mm. Accessories are made of copper and chrome plated stainless Those durable external tubes and accessories are mainly use for outdoor ,will last for years.

3 Features of SOLARTECH solar showers

- A. All shape design allows solar energy to be absorbed from all directions.
- B. External tubes are covered by lacquer compounded by special raw materials. it's environmental and durable, absorb more heat in less time, special for outdoor use.
- C. External and internal tubes are double guarded by rubber seals engineered for outdoor use specially. The rubber seals can hold the size for a long time, so the leakage will be avoided.
- D. The water inlet can connect to any standard garden hose, no plumbing needed.

4 Multiple leakproof detections by 0.6 MPa air pressure

Multiple Leakproof detections by 0.6 MPa air pressure

- 1 The leakproof detections of all accessories
- 2 The leakproof detection of Internal pipe
- 3 The leakproof detection of Internal pipe after it is connected to the external tube
- 4 The leakproof detection of external tube

5 Special choice of LED showerhead

Special choice of LED shower head from SOLARTECH, with that you can have a enjoyable and colorful shower. a popular product in the world, it's environmental and energy-saving, that's perfect with SOLARTECH solar showers. when water flows down, the LED will light instantly and automatically, the LED color will change gradually and automatically according to the temperature of water;

The advantage of LED shower head

- A. No batteries, no wires needed.
- B. Color changes according to the temperature of the water running through it!
- C. Showerhead changes the color of the water coming out using built-in LED's.
- D. Low flow, water conservation with a unique fun soothing experience.
- E. The showerhead handle connects directly into your shower pipe.
- F. Shower head lights up jets of water using the multi-colored LED and visually indicates the water temperature by the color.
